

Seed Packet Project

This practical project will enhance any *Ag in the Classroom* program.

Place ½ to 1-cup seed in sandwich-size Ziploc bags along with a card telling about that particular seed. After preparing the seed bags, place one each of all the seeds in a larger bag. Design your own seed packets and distribute them to local teachers.

Materials and guidelines are listed below.

One-half to one cup each of each seed:

Corn
Oats
Wheat
Grain Sorghum
Soybeans
Popcorn
Sunflower

- One sandwich-size Ziploc bag for each seed.
- One-gallon size Ziploc bag for the seven individual seed packs (if you use just ½ cup seed, the quart size Ziploc bags are large enough).
- Use clean, bug free, untreated seed.

Order your seed information cards from the Farm Safety & Ag Education Division at 785-587-6000 ext. 6150.
