

# Regulations – Federal Motor Carrier

§ 393.13 Retro reflective sheeting and reflex reflectors, requirements for semi trailer and trailers manufactured before December 1, 1993.

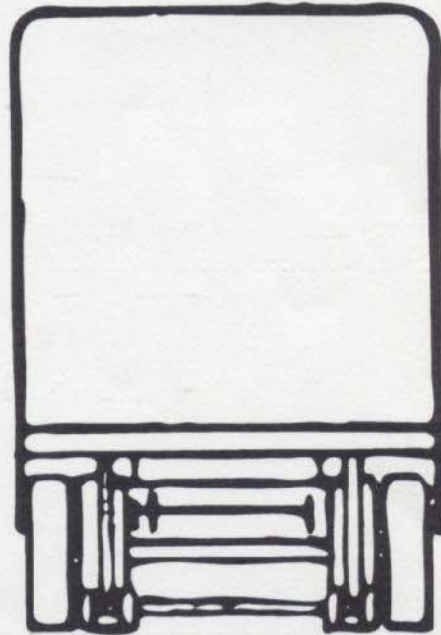

REAR

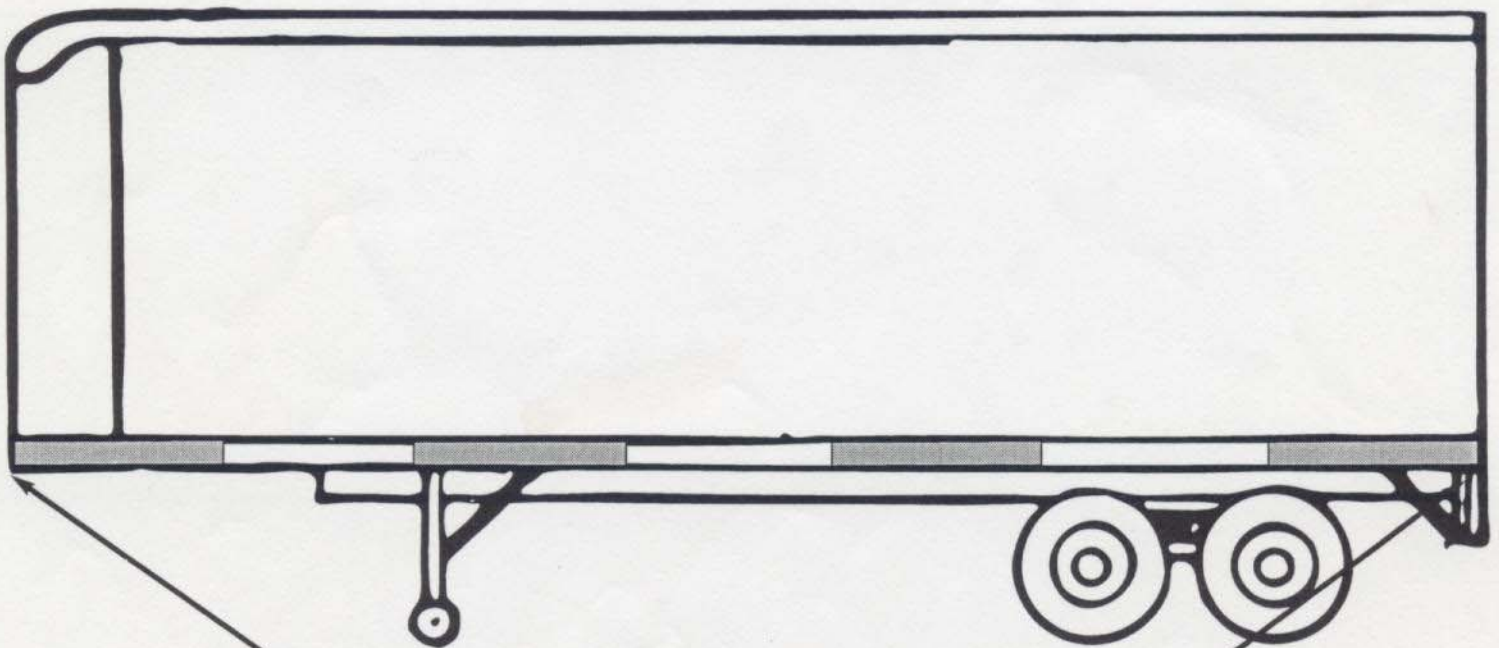

White strips of retro reflective sheeting (12 inches long)

Extending across the full width of the trailer.

FRONT

EACH SIDE

The strip does not have to be continuous but the sum of the length of the segments should be equal to half of the length of the trailer. Spaces between segments should be distributed as evenly as possible.
