

Planting Instructions for Garden in a Glove Seeds

Tomatoes

Planting Depth: ¼"

Thin to 2'-3'

Full Sun

Height: 4-6'

When to Plant: After danger of frost

Start Indoors: 6-8 weeks before last frost

Maturity: 80 days.

Garden tip: Mulching helps maintain consistent moisture. In experiments using polyethylene mulch painted different colors, highest yields in tomatoes resulted from red or black mulch.

Radishes

Days to germination: 4-7

Planting depth: ½"

Days to harvest: 22

Spacing row / plant: 12" / 1"

Planting instructions: In full sun, sow 2 seeds per inch in the row. Cover seeds firmly with soil. When plants have 3 or 4 leaves, thin to 1 inch apart. For steady crop, sow every 10 days until warm weather and again in fall until 30 days before frost.

Suggestions: Radishes exhibit best flavor when grown in cool weather and full sun. Use thinnings in salads. For mild radishes, mulch and keep watered to speed growth.

Lettuce

Planting depth: ¼"

Sun/shade: Sun

Maturity: 45-55 days

Direct Sow: After danger of frost

Start indoors: 4 weeks before last frost

Garden Tip: Extend the harvest time by planting successive crops.

Carrots

Type: Hardy Biennial/grown as Annual

Planting depth: ½"-1/4"

Thin to: 2"-4"

Sun/shade: Sun

Maturity: 65 days

Direct sow: 2 weeks before last frost; several successions up to midsummer heat.

Garden tip: Carrot's shape and color may vary according to the type of soil and commencement temperature. Lower temperatures give yellower carrots and reduced size and shape.

Cucumbers

Planting depth: 1"

Thin to: 12" diameter hill 6' apart

Sun/Shade: Sun

Maturity: 55-60 days

Direct sow: after danger of frost & soil warms

Start Indoors: 2-4 weeks before last frost

Garden tip: Growing on a trellis saves space, plus makes for easy picking!
