

2022-2023 Kansas FFA Discussion Meet Questions

FFA Focus:

In recent years, the number of students interested in leadership positions has decreased despite clear evidence that they are beneficial to student success. How can FFA encourage more students to engage in leadership opportunities?

Agricultural Education:

Less than 2% of the United States population is directly involved with agriculture. In order to bridge the gap, how can we diversify and be inclusive of non-traditional agriculture and urban communities to engage with agriculture?

Crop:

Advancements in technology and sustainability offer solutions to challenges farmers and ranchers have faced for years. How can the agriculture industry improve access to and help farmers and ranchers deploy these emerging technologies and solutions in their operations?

Livestock:

Plant based protein brands such as Beyond or Impossible are now commonplace in major fast-food restaurants and grocery stores. How can the agriculture industry embrace a growing plant-based protein market and traditional meat sources at the same time?

Natural Resources:

Production costs, such as rising fertilizer prices, are important to farmers in their long-term success as an operation. How can the agriculture industry tackle rising production costs and keep farms economically sustainable?
