

Is that farmer pulling over to allow me to pass?

Not necessarily!

- Accidents occur when motorists hurry around farm vehicles, resulting in injury or death.
- Large farm equipment making a LEFT TURN needs extra space. They may be pulling over to turn left.
- Tractors move into the center lane to avoid hitting guardrails or mailboxes that those following can't see.
- Tractor operators can't always pull off the road immediately due to ditches or available safe space.

Are you using SMV signs illegally?

SMV signs may only be used for motorized vehicles designed to travel at speeds of 25mph or less on the road. **Any other use is illegal.**

When you see a SMV sign...

- Slow down immediately and use caution.
- Do not pass on double yellow lines, around blind curves or on hill crests. Avoid passing other vehicles in line behind the farm equipment.
- Watch for hand signals, turn signals or other signs that indicate the slow-moving-vehicle is preparing to turn.
- Look for nearby driveways and field entrances that farm equipment operators may plan to use.
- Pass with caution ~ slowly and deliberately, watching for other traffic and sudden turns.
- Above all... Be patient, be kind and stay behind.
