

Think you're quick? Machines are quicker!

Instructions

Hold timer at top while friend holds hand below. Drop timer and have your friend grasp it as it drops. The point at which your friend grasps the timer is an indication of their simple reaction time.

Try Again

.200 seconds (1/5th of a second)

With this slow of a reaction, you will be wrapped up 2.6 feet in a PTO shaft!

Not Bad

.175 seconds

You will have been cut eight times by a rotary lawn mower at this rate.
You're slipping...stay alert!

About Average...

.150 seconds

A belt and pulley travels 10 feet in this amount of time.

You're Pretty Quick

.125 seconds

In this amount of time, you will be wrapped up 1.95 feet in an auger.

But Machines are Quicker!

.100 seconds

Watch out, by now you will already be 1.3 feet into a PTO shaft!

You can't be this good...
try again!
