

Human Reaction Time Demonstration

Preparation

Cut 1" x 3" and 1" x 6" strips of paper.

Procedure

- Ask participants if they think they are really fast.
- Hold a strip of paper between the thumb and index finger of one hand.
- Hold the thumb and index finger of your other hand on either side of and about an inch away from the paper and about halfway down the length of paper.
- Release the paper with one hand and catch it with the other.
- Tell participants "See how easy it is!"
- Have participants pair up, with one person releasing the paper and the other trying to catch it. (They won't be able to very often.)
- Ask the group how many times out of 10 they were successful.
- Remind participants that this is one human against another and ask them how they think they would do against a machine.
