COUNTY COMPARISON

Objective: Compare how geographical, political and economic factors affect the cost of food in countries worldwide.

Materials:

- American Farm Bureau's Food and Farm Facts book (page 5)
- Computer with internet access

Directions:

- Review page 5 of your Food and Farm Facts book.
- Pick any country except the United States.
- Review the cost of food associated with the country you chose, then using your computer, research that country to identify the geographical, political and economic factors that might contribute to the cost of food.
- Prepare a presentation, poster or multi-media report to share what you have learned in your research.

Ag Connections:

- What factors affect the cost of food worldwide?

- How does the cost of food affect quality of life?

- What roles do education and aid organizations play in helping others where the cost of food is high?
