

# Popcorn Fun Facts

**Popcorn is a small seeded variety of corn.**

Popcorn kernels pop when they are dried and subjected to great heat.

Popcorn is a whole grain. It is made up of three components: the germ, endosperm, and pericarp (also known as the hull).

**The Incas of Peru grew popcorn before the discovery of America.**

The peak period for popcorn sales for home consumption is in the fall.

A popcorn kernel can pop 3 feet in the air.
