

Candy Crayons

You'll need:

Color coordinating paper and candy melts (crayon label template below)

Large pretzel rods (halved)

Break pretzel rods in half, works best to lightly score the pretzels with a serrated knife in the middle and then they just snap clean when you break them.

Place a few candy melts in separate bowls and follow the directions on the package to melt them in the microwave.

You only need to dip the ends of the pretzels so just quickly dip and let the excess shake off and then dip the other side. If your candy starts to get hard, just warm it a little more.

Do all of your colors and let them dry completely. While they are drying you can prepare your labels.

Cut the labels and wrap them around the crayons and secure with a piece of tape.
